Subject: RE: Alex Dunn Visit

It was such an informative visit, and I am grateful I made it before the curtailment of so much travel. The tour was enlightening and inspiring. Thank you for accommodating us and for the picture. Stay virus free and we'll hopefully talk soon.

Alexandra Dapolito Dunn, Esq.

Subject: Alex Dunn Visit

Hi Alex,

I just wanted to drop you a short note and thank you for visiting Intel in Oregon last week. Courtney and I were excited that you and Chris arrived early since this allowed us to informally talk about Intel's history, some fun engineering topics like Moore's Law, and also preview our collaborative efforts with your folks on chemicals. We were also glad that you were able to meet a few of our very senior staff members over lunch and during the site tour. Hopefully your short glimpse into our factory gave you a feeling for how complex it is to manufacture some of the world's smallest machines and also how much we focus on caring for our employees, our communities, and the environment.

Following our conversations last week, it was great to see the news on the extension and potential edits to the Priority Chemicals Fees. It was also important to see the updates from the SACC on the NMP Draft Risk Evaluation. Since these and the other topics we discussed are so current, I thought it would be a good idea to include a copy of the slide deck we reviewed in the room last week (see attached). I've also included a couple pictures from our tour as well.

It was truly our pleasure to have you out for this visit. Please don't hesitate to reach out for additional information or to let us know if you or your staff would like to see more.
